REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: prior art does not disclose an animal insecticide applicator comprising a bag for holding insecticide having a top, two sides and a bottom, a rigid tubular support extending across the top of the bag and a pair of tie ropes. The first tie rope secured to and extending down at least part of the first side of the bag and extending the entire length of the tubular support along the top of the bag in one direction and having a length of rope hanging free at the second side of the bag for hanging the bag from a support. The second tie rope secured to and extending down at least part of the second side of the bag and extending the entire length of the tubular support along the top of the bag in an opposite direction and having a length of rope hanging free at the first side of the bag for hanging the bag from a support. Other applicator bags have a rope used to support the bag in a hanging position but do not teach the use of two ropes extending the length of the bag top in opposite direction and being secured to the sides of the bag; these features are unique.

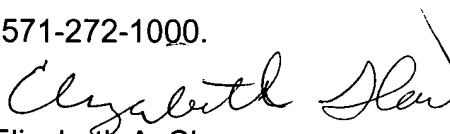

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
